DETAILED ACTION

1. Claims 1-4, 6-11 and 13-19 in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: The prior arts of record do not disclose alone or in combination the following:

Regarding Claim 1, at least one piezoelectric element that transfer force to the magnet, which is juxtaposed with the piezoelectric element, outputs signals when the rotor rotates, the signals being useful in determining at least a position and speed of rotation of the motor, the magnet magnetically braking the rotor from turning when the motor is deenergized.

Regarding Claim 7, at least one piezoelectric element juxtaposed with the magnet and generating a signal as the rotor moves past the magnet, the signal being representative at least the position of the rotor.

Regarding Claim 14, piezoelectrically, which is defined as a functioning by means of piezoelectricity, generating signals when the rotor rotates pasts the magnets, which is juxtaposed with the piezoelectric element, to determine at least one of position and speed of the rotor.

Further, prior arts of record used, for example Archer's a power assembly for controlling blinds and awnings, Perhats motor brake arrangement and Sandhagen's a displacement sensor would not provide the of the current invention teachings and not reasonable convey prima facie combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the
